

Indicators

Advantages

- High visibility of data connected with strategic or process measurements.
- Early alert of trends that are not in line with the objectives.
- Allows for the sharing of information connected with organizational performance.
- Secure data storage.

General Functionalities

- ISOKEY allows you to display strategic and process indicators using different graphic elements (traffic-lights, tendency arrows, score meters, bar charts, line plots, etc.).
- Data entry can be done manually or automatically through communication with other systems.
- Supports indicators with the following properties:
 - Daily, weekly, monthly, quarterly, biannual and annual periods, measured in calendar or personalized year.
 - Quantitative, qualitative and valuation indicators.
 - Mode: More-is-better, less-is-better and median-is-better.
 - Defining formulas for the indicators (average, sum, etc.)
 - Notifications of indicator changes (change in state or tendency).
- Indicator control panels, with free design (panels by processes, sectors, areas, individuals, etc.).
- Relationship of the indicators with other system elements (projects, maps, processes, etc.).
