

Presentations

Advantages

- Allows you to create presentations with ISOKEY elements that need to be presented dynamically (Gantt diagram, indicators, comments field, etc.).
- Enables navigation between slides using an ISOKEY navigator.
- Allows you to analyze different time ranges for the data through an interactive view.
- Ensures traceability of the analyzed presentations through the generation of frozen versions.
- Enables collaboration through forums among the persons involved in the preparation of the presentation.

General Functionalities

- Slides can be created by the user from a toolbar that enables you to design personalized backgrounds, paste logos and other images and include ISOKEY Gantt charts, indicators, text boxes, etc.
- Possibility of setting the order of appearance of the slides using drag and drop.
- Interactive view for changing the data range of the indicators.
- Navigation in the presentations through a presentation view that ensures proper visualization for the presentation's target audience.
- Generation of "frozen" versions of the presentations that save the data as it was at the time the "frozen" version was generated.
- Generation of Power Point files based on the "frozen" presentations.
- Presentation communication forum, for exchanging messages and files among the persons in charge of preparing the presentation.
