

Process Plans

Advantages

- Facilitates the recording and communication of the organization's processes through process maps and flowcharts.
- Streamlines the presentation of relationships between the different processes of the organization (client-supplier relations).
- Enables navigation from each Process to the different elements related to it (documents, indicators, nonconformities, accidents, audits, others).

General Functionalities

- Recording processes in a hierarchic structure (macro-process, processes, activities, tasks).
- Establishing client-supplier relationships between the different processes.
- Data sheet for each process containing all the information related to that process, including: Description, Client-Supplier Relations, Documents, Indicators, Nonconformities, Audits, Accidents, etc.
- Process maps for communicating process structure (process maps and flowcharts).
